2 January 1980

MEMORANDUM FOR: Chief, Arms Control Intelligence Staff

FROM: Director of Central Intelligence

SUBJECT: Material for Worldwide Wrap-up Briefing

25X1

In preparation for my worldwide testimony to the Congress in January-February, I'd like to have a number of charts that encapsulate the comparative warhead situation with and without SALT. What I think I would like is a chart from now until about 1990 that shows what our best estimate of total Soviet warheads is and a separate chart on quick-response hard-target warheads. We would then go on with a high SALT estimate, best no-SALT estimate, and a high no-SALT estimate. We should then go to the Department of Defense and get from them blue lines to put on these charts with US planned numbers of warheads.
